*ALICE PWG-JE Run 3 charged-particle jets — end-to-end pipeline for the first inclusive cross-section measurement at $\sqrt{s} = 13.6$ TeV (preliminary; paper in preparation; EPS-HEP 2025 PWG-JE merge talk on behalf of ALICE).
Pb/scintillating-fiber calorimetry R&D for the ePIC Barrel Imaging Calorimeter.*

Education

Ph.D. Candidate, Physics — Sungkyunkwan University 2022.03 – expected 2027.02

Advisor: Beomkyu Kim. Thesis: *R-dependent charged-particle jet production in pp collisions at $\sqrt{s} = 13.6$ TeV with ALICE*. Defense expected 2026.12; degree conferral 2027.02.

B.S., Physics — Sungkyunkwan University 2021.02

Appointments and Collaboration Membership

ALICE Collaboration, CERN, Geneva	2022.10 – present
ePIC Collaboration, Brookhaven National Laboratory	2024.02 – present
LAMPS Collaboration, RAON, Korea	2022.03 – 2024.04

Awards and Fellowships

- **BK21 FOUR Graduate Scholarship** — Sungkyunkwan University Physics BK21 sponsored unit (Korean Ministry of Education), 2022 – present.
- **Conference travel support** — KoALICE, NRF Korea–CERN program, and SKKU Graduate School; HP 2024 (Nagasaki), QM 2025 (Frankfurt), EPS-HEP 2025 (Marseille).

Research Experience

Main analyzer, ALICE Run 3 charged-particle jets (PWG-JE) — CERN 2023.04 – present

- End-to-end ownership of the first ALICE Run 3 inclusive charged-particle jet cross-section measurement at $\sqrt{s} = 13.6$ TeV — O²Physics task development, QA, Bayesian/SVD unfolding, full systematic-uncertainty program, and PWG-JE-approved preliminary results. Paper in preparation; presented on behalf of ALICE at EPS-HEP 2025.
- **Tracking-efficiency systematics for Hard Probes 2026 (PWG-JE)** — contributed the pp charged-particle tracking-efficiency systematics at $\sqrt{s} = 13.6$ and 5.36 TeV (p_T -binned) for the 2022, 2023, and 2024 periods; the ITS-TPC matching code was reused by a PWG-JE colleague as a starting point for PbPb tracking studies.
- **Trigger-level inefficiency in the new readout** — quantified bunch-crossing and track-matching inefficiencies introduced by the continuous-readout TPC and asynchronous reconstruction (each with its own time-frame); derived signal-loss corrections used in subsequent PWG-JE Run 3 charged-jet analyses.
- **Track p_T resolution** — studied data–MC resolution mismatch via covariance-matrix propagation, MC residuals, and V0 mass-resolution methods; tuned the central track momentum-resolution smearing methodology with a p_T -dependent profile used in Run 3 charged-jet systematic studies.
- **Cross-section normalization** — established the Run 3 charged-jet normalization based on the TVX visible cross section under continuous readout; authored the PWG-JE cross-section normalization framework (PR #14057, merged) used at particle level by the SKKU Run 3 charged-jet analyses (pp 13.6 TeV and O+O). Provided the normalization factor and QA for the ALICE Run 3 O+O charged-jet measurement led by two MSc co-analyzers in the SKKU group.
- **Event-generator production for model comparison** — managed multi-setup POWHEG-BOX and PYTHIA 8 productions (Monash, colour-reconnection modes, rope and shoving hadronization) plus HERWIG 7 samples for the Run 3 jet-radius model comparison, with provenance tracking across generator configurations.
- Presented preliminary results at **EPS-HEP 2025** (on behalf of the ALICE Collaboration; PWG-JE merge talk),

Hard Probes 2026 (parallel talk and poster), **Quark Matter 2025**, and **Hard Probes 2024**; regular PWG-JE working-group speaker since 2023.

- Extending the program to semi-inclusive h+jet recoil (PWG-JE Run 3), R -dependent cross-section ratios as a hadronization-vs-perturbative-radiation probe, and groomed substructure (Soft Drop z_g ; primary Lund-plane density) in high-multiplicity pp and forthcoming O+O / Ne+Ne running, motivated as a small-system baseline for energy-loss searches.

Detector physicist, ePIC Barrel Imaging Calorimeter (BIC) – Korea-BIC consortium 2024.02 – present

- Led PMT-module QA prior to test beams – cosmic-ray and source signal characterization, timing-coincidence checks, optical-coupling stability; applied per-module acceptance criteria.
- On-site DAQ shifter at **KEK AF-AR** (2025.03; equalization, prompt analysis; co-author on the corresponding paper in preparation) and lead offline analyst for the **CERN PS T10** (2025.07) campaign of the Pb/scintillating-fiber prototype – energy response, resolution, and linearity (in preparation, 2026).
- Contributed energy- and η -dependent sampling-fraction studies in JANA2 / EIC-recon for the Korea-BIC simulation effort; Geant4 prototype modeling.
- Module assembly and integration – Pb/scintillating-fiber bundle alignment, polishing, PMT/SiPM coupling.

Detector R&D, LAMPS Forward Tracker – RAON, Korea 2022.03 – 2024.04

- Early-stage design and Geant4 simulation of an MPPC–scintillator-plane forward tracking detector; sensor surveys, specifications, and tracking-concept feasibility studies.

Selected Publications

Full publication list: inspirehep.net/authors/2117232. ALICE Collaboration co-author since 2022.10.

First/lead-analyst works in preparation

- **FLAGSHIP** ALICE Collaboration, *R -dependent charged-particle jet production in pp collisions at $\sqrt{s} = 13.6$ TeV with ALICE* (in preparation, target 2026). *First ALICE Run 3 inclusive charged-jet publication; thesis paper.* [main analyzer; full responsibility for analysis, systematics, unfolding, and paper draft]
- Korea-BIC Collaboration, *Beam-test characterization of a Pb/scintillating-fiber imaging calorimeter prototype – CERN PS T10 (2025.07) campaign* (in preparation, 2026). [lead offline analyst; on-site prompt analysis and follow-up offline reconstruction]

Submitted (detector)

- Y. Hong, J. Bok, G. An, **J. Bae et al.**, “Test-beam performance of the AstroPix silicon sensor for imaging calorimetry,” submitted to *Nucl. Instrum. Meth. A* (NIMA-D-26-00572). Corresponding: Prof. Sanghoon Lim. [co-author; ePIC BIC silicon-layer test-beam analysis]
- H. Lee, C. Lee, J. Ryu, G. An, **J. Bae et al.**, “Beam test of a Pb/SciFi prototype for the Barrel Imaging Calorimeter at the Electron-Ion Collider” – first beam-test campaign; submitted to *Nucl. Instrum. Meth. A* (NIMA-D-26-00482; also submitted to JKPS); arXiv preprint posted. Corresponding: H. Lee. [co-author; module-construction support and PMT/module performance characterization (KPS Spring 2025 poster)]

In preparation (detector – co-author roles)

- Korea-BIC Collaboration, *Beam-test characterization of a Pb/scintillating-fiber imaging calorimeter prototype – KEK AF-AR (2025.03) campaign* (in preparation, 2026). [co-author; DAQ shifter and on-site prompt-analysis at KEK test beam]

ePIC/EIC and related calorimeter R&D (peer-reviewed)

- S. Y. Jang, G. An, **J. Bae** *et al.*, “Performance of dual-readout calorimeters for various absorbers,” *Nucl. Instrum. Meth. A* (2026), DOI 10.1016/j.nima.2026.171598.

- LAMPS Collaboration, “Status of large acceptance multi-purpose spectrometer (LAMPS) at RAON,” *AIP Conf. Proc.* **2319** (2021) 080002. [co-author; SiPM and scintillator-based detector R&D]

Software and Computing

ALICE O²Physics — AliceO2Group/O2Physics

- **Central-framework fix** to the track momentum-resolution smearing methodology shared across analyses (PR #15174, merged).
- **Authored the PWG-JE cross-section normalization framework** (PR #14057, merged) used by the SKKU Run 3 charged-jet analyses for pp 13.6 TeV and O+O.
- 37 pull requests, 18 merged (2023 – present), covering jet finding, response matrices, systematic-uncertainty pipelines, hadronic-rate fixes, and central reconstruction.

Invited and Contributed Talks

Summary since 2022: 3 invited workshops [external] · 5 invited collaboration-meeting talks [internal] · 8 international conference contributions (one on behalf of the ALICE Collaboration at EPS-HEP 2025; a parallel talk and a poster at Hard Probes 2026) · 9 domestic (KPS) · regular PWG-JE working-group speaker since 2023.

Invited Talks (external workshops, seminars)

- **France–Korea Particle Physics Network (FKPPN) Workshop**, Inha University — *Cross-section normalization in Run 3; charged-jet studies in ALICE Run 3* — 2025.12
- **1st Heavy-Ion Meeting (HIM 2025)**, APCTP — *From precision to structure: jet measurements in ALICE Run 3 and ongoing substructure studies* — 2025.05
- **FKPPN Workshop**, Inha University — *Charged-jet studies in ALICE Run 3* — 2023.11

Invited Collaboration-Meeting Talks (internal)

- **Korea-BIC 2025 Summer Workshop** — *Data analysis of the recent beam test at CERN* — 2025.09
- **KoALICE National Workshop 2024** — *Jet analysis status: first look at the charged-particle jet spectrum in Run 3 pp collisions* — 2025.01
- **ALICE Physics Week 2024** — *Charged-particle jet production in Run 3* — 2024.12
- **KoALICE National Workshop 2023** — *Charged-jet O^2 MC and data QA* — 2024.01
- **KoALICE National Workshop 2022** — *Dijet studies with ALICE at the LHC* — 2023.01

Contributed Talks and Posters

- **Hard Probes 2026**, Nashville — *Jet-like dihadron correlations in pO, OO, and Ne–Ne collisions with ALICE* [international, talk] — 2026.06
- **Hard Probes 2026**, Nashville — *Characterizing inclusive charged-particle jet production and fragmentation in pp collisions* [international, poster] — 2026.06
- **EPS-HEP 2025**, Marseille — *Inclusive and semi-inclusive jet cross-section measurements in pp collisions at $\sqrt{s} = 13.6$ TeV with ALICE* [on behalf of the ALICE Collaboration; PWG-JE merge talk] — 2025.07
- **INPC 2025**, Daejeon — *Charged-particle jet and jet quenching measurement in pp collisions at $\sqrt{s} = 13.6$ TeV during LHC Run 3 with ALICE* [international, talk] — 2025.05
- **Quark Matter 2025**, Frankfurt — *Inclusive charged-particle jet spectrum in pp collisions in Run 3 at $\sqrt{s} = 13.6$ TeV with ALICE* [international, poster] — 2025.04
- **Hard Probes 2024**, Nagasaki — *First measurements of charged-particle jet production in pp collisions at $\sqrt{s} = 13.6$ TeV with ALICE* [international, poster] — 2024.09
- **Quark Matter 2023**, Houston — *Charged-particle multiplicity distribution in pp collisions at $\sqrt{s} = 13.6$ TeV with ALICE* [international, poster] — 2023.09
- **ATHIC 2023** (9th Asian Triangle Heavy-Ion Conf.), Incheon — *Dijet studies at the LHC* [international, poster] — 2023.04
- **KPS Spring 2026**, Daejeon [domestic, talk] — *R-dependent charged-particle jet production in pp collisions at $\sqrt{s} = 13.6$ TeV with ALICE* — 2026.04
- **KPS Fall 2025**, Daejeon [domestic, talk] — *Inclusive and semi-inclusive jet cross-section measurements in pp collisions at $\sqrt{s} = 13.6$ TeV with ALICE* — 2025.10
- **KPS Spring 2025** [domestic, talk] — *Inclusive charged-particle jet spectrum in pp collisions in Run 3 at $\sqrt{s} = 13.6$ TeV with ALICE* — 2025.04
- **KPS Spring 2025** [domestic, poster] — *Prototype calorimeter QC for the Barrel Imaging Calorimeter at the EIC* — 2025.04
- **KPS Fall 2024** [domestic, talk] — *First jet measurement in ALICE Run 3: charged-particle jet production* — 2024.10
- **KPS Spring 2024** [domestic, talk] — *Charged-particle jet production in pp collisions at $\sqrt{s} = 13.6$ TeV* — 2024.04
- **KPS Fall 2023** [domestic, talk] — *First look at charged-particle jet production in pp collisions at $\sqrt{s} = 13.6$ TeV with ALICE Run 3 data* — 2023.10

- **KPS Spring 2023** [*domestic, poster*] — *Dijet studies at the LHC* — 2023.04
- **KPS Fall 2022** [*domestic, poster*] — *Dijet studies with ALICE at the LHC* — 2022.10

Test-beam and Detector Activities

ALICE ITS2 alignment monitoring at CTF level (Run 3)

- Analyzed compressed-time-frame (CTF) data — below the standard AO2D analyzer interface — to provide period-by-period tracking-performance diagnostics.

ePIC Barrel Imaging Calorimeter test beams

- **CERN PS T10** (2025.07) — on-site analysis lead; energy response and resolution.
- **KEK AF-AR** (2025.03) — DAQ, equalization, prompt analysis.
- **Korea-BIC module production** (2024 – 2025) — Pb/scintillating-fiber bundle assembly, polishing, and PMT/SiPM integration; PMT-level QA on the prototype modules used in the 2025 beam-test campaigns.

Service and Professional Activities

- **PWG-JE tracking-efficiency contribution for Hard Probes 2026** — pp 13.6 TeV studies; ITS-TPC matching code reused by a PWG-JE colleague as a starting point for PbPb tracking studies.
- **ALICE Run 3 O+O charged-jet measurement** (PWG-JE) — co-author on the Analysis Note; service contribution: cross-section normalization factor derivation and QA; co-mentor of the two MSc analyzers.
- **ALICE ITS2 alignment monitoring** — service work at CTF level for tracking-performance diagnostics.
- **ePIC Korea-BIC analysis coordination** — analysis liaison between the SKKU group and the Korea-BIC consortium for beam-test data products.
- **KoALICE national activities** — regular participation since 2022, including invited collaboration-meeting talks.

Teaching and Mentoring

Student mentoring (non-supervisory) — Sungkyunkwan University 2024 – present

- *Wooseok Ham* (M.Sc., co-analyzer on the ALICE Run 3 O+O charged-jet measurement) and *one further MSc co-mentee* (co-analyzer on the same O+O analysis) — mentored on Run 3 jet reconstruction methodology, correction procedures, and systematic-uncertainty estimation; co-author with W. Ham on the corresponding PWG-JE Analysis Note.
- *Harim Seong* (undergraduate) — ePIC BIC detector-performance studies using JANA2-based reconstruction; energy response and sampling-fraction extraction.

KoALICE O² Tutorial — student co-organizer and instructor — Sungkyunkwan University, Suwon 2024.01.22 – 23

- Co-organized (with Hyungjun Lee) the two-day Run 3 analysis-framework tutorial for the Korean ALICE community — ~22 participants from SKKU, Inha University, and other Korean institutes; listed as the official Indico contact for the workshop. indico.cern.ch/event/1361235
- Instructor on *Running O² Physics with Hyperloop* (solo) and co-instructor on *Practical PWG-JE tasks* (with H. Lee).

Teaching Assistant, SKKU Physics (2022 – 2024) — *Nuclear Reactions* (graduate), *Quantum Mechanics II*, *General Physics I and Laboratory I*.

Technical Skills

Languages. English (professional working proficiency), Korean (native).

Programming. C++, Python, ROOT, $\LaTeX$, Bash, Git.

Machine learning. PyTorch; independent validation study of the FM4NPP foundation model on the public TPCpp-10M benchmark (2026).

HEP frameworks. ALICE O²Physics, Geant4, JANA2 / EIC-recon, FastJet.

Event generators. PYTHIA 8 (Monash, colour-reconnection modes, ropes, shoving), POWHEG-BOX, HERWIG 7.

Analysis methods. jet reconstruction and unfolding (Bayesian, SVD), efficiency and systematic-uncertainty evaluation, data/MC validation, test-beam calibration and energy-response fitting.

Detector hardware. PMT and SiPM readout characterization, cosmic-ray and source calibration, optical-coupling QA, calorimeter module assembly.
